

FOR IMMEDIATE RELEASE

(Traverse City, Michigan, USA. March 10, 2009) - MAXAL INTERNATIONAL, INC. ANNOUNCES THEY HAVE RECEIVED THE CWB (CANADIAN WELDING BUREAU) APPROVALS.

MAXAL International, Inc. (www.maxal.com) announced today that they have received the CWB (Canadian Welding Bureau) approval for the entire product line. The addition of this approval allows the MAXAL products to be used throughout Canada.

National Sales Manager, Mr. Brian J. Farkas, is quoted as saying "MAXAL is very excited with this opportunity to bring our highly advanced aluminum wire electrode products to the Canadian market. Our entire product line of filler alloys and diameter ranges are certified by the Canadian Welding Bureau. This will allow MAXAL to continue to gain real exposure in the aluminum welding consumables arena."

MAXAL specializes in the manufacturing of high quality aluminum welding wire. MAXAL is a state-of-the-art aluminum welding electrode manufacturing company based in Traverse City, Michigan. The company is located in a brand new 40,000 sq ft manufacturing facility. It is owned and operated by leaders in the field of aluminum welding technology and electrode production. Management has over 200 years of combined experience in the aluminum weld wire manufacturing and welding industries. Our new fabrication technologies produce exceedingly high-quality electrode that has been recognized by our partners as the new standard for product quality.
